7+ years of product design | Enterprise B2B SaaS in construction, healthcare and HR tech

Professional Experience

Procore Technologies | Senior Product Designer July '25 - Present

Enterprise B2B capital planning and portfolio management for construction owners

- Lead end-to-end UX for capital planning across 9,000+ projects and multi-billion-dollar owner portfolios
- Developed bulk data import, project lifecycle management, and interactive dashboards for data-driven decisions
- Built an AI customer-feedback engine on 10+ months of Gong calls, turning pain points into roadmap priorities
- Ran usability testing with international product and engineering teams, and discovery calls with customers in the USA and Europe
- Presented the work at Groundbreak in Houston to 75+ international customers and leaders
- Designing AI on the product: chatbot copilot, executive summaries, and risk management, including early risk detection

Noora Health | Product Designer Aug '24 - May '25

Designed mobile-first session tracking for government healthcare workers across South Asia

- Scaled a WCAG-compliant, multilingual mobile application to 10K+ government healthcare workers across South Asia, optimizing session tracking and supporting 9+ localized scripts

xto10x Technologies | Product Designer Feb '23 - Feb '24

Designed HR tech modules for goal setting, leadership assessments and performance tracking

- Developed a goal-setting module with generative AI (ChatGPT) for goals, key results, and action items
- Designed Individual Development Module with draft saving, adding goals, supporting requests and manager dashboard that improved output quality by 40–60% and reduced user effort by 60%+
- Created an assessment report to help leaders identify strengths and growth areas improving clarity, reducing ambiguity, and amplifying decision quality
- Built a product used by Meesho, Zepto, CRED, Groww, and Homelane

Kindly Health | Product Designer July '22 - Sept '22

- Designed interfaces for simplifying doctor workflows and payment process
- Developed a doctor appointment calendar with real-time scheduling and tracking

Bajaj Finserv Health | UI Designer Aug '19 - June '22

- Led workflows for appointments, consultations, patient records and staff access for 100,000+ doctors across India
- Built a design system, designed health blogs, and created a dashboard to track doctor activity

Education

Master of Design | Indian Institute of Technology, Delhi (IIT-D) | Jul '17 - Jul '19

B.E Mechanical Engineering | Pune University | Jul '13 - Jul '17

Achievements

- Design Thinker for Government of India's Vernacular Innovation Program | Jan 2022
- Winner – Ford Symposium "City of Tomorrow" essay on Smart Cities | Oct 2017
- Avery Dennison InvEnt Scholarship for Innovation | Aug 2014

Academic Projects

- Developed a WHO-recognized Autism Support digital guide and diagnostic checklist
- Designed an illustrated puberty education booklet for adolescent girls
